---

## Introduction

---

Summer Research Course (SRC) is a three week long learning program for health professionals. The course has been developed by Ibn Sina National college for Medical Studies – Research Center (ISNC-RC). The course has evolved through a series of lectures in research methodology that ISNC-RC has been offering to students of ISNC since 2015. The course will be taught by a multidisciplinary team from ISNC.

---

## Aim and Purpose

---

- To build the research capacity of young professionals and researchers from the fields of health sciences to foster a spirit of critical enquiry.
- To support health care professionals, students, and research scholars involved in research as part of their academic requirements or professional engagement.
- To meet the needs of researchers who are in the process of developing their research proposals, acquiring skills of data collection, analyzing their data, and those aiming to get their studies written and published.

---
